### **Grape Quantities Needed To Make Finished Wine**

The table below provides a reasonable basis for making estimates of how much whole grape it takes to make finished wine. These estimates assume that you are using a conventional Crusher-Destemmer and a basket press. The final amount depends upon the kind of grape, the vintage (annual variance in cluster size), and how hard you press the must.

POUNDS OF GRAPE	GALLONS OF RED WINE	GALLONS OF WHITE WINE
100	7	6
200	15	13
300	22	19
400	30	25
500	37	31
600	45	38
700	52	44
800	60	50
900	67	56
1000	75	63
2000	150	125
